Plans for Bournville Substation Community Garden October 2019

We contacted local residents to gain their input in this garden.

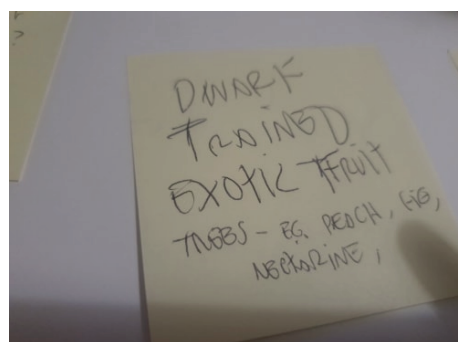

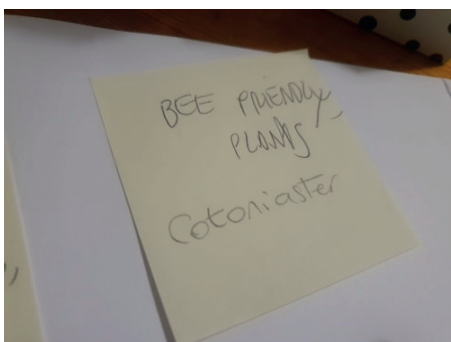

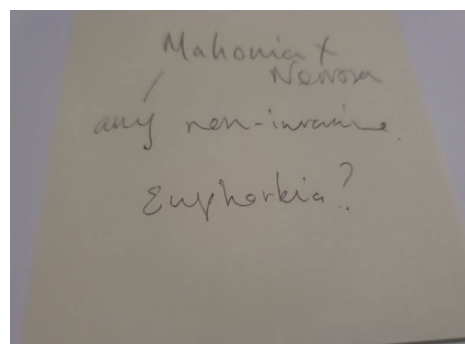

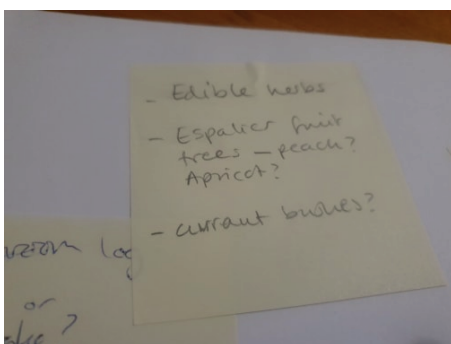

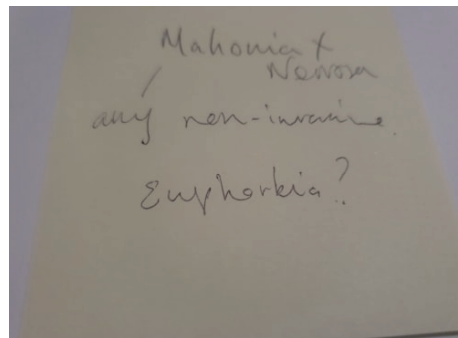

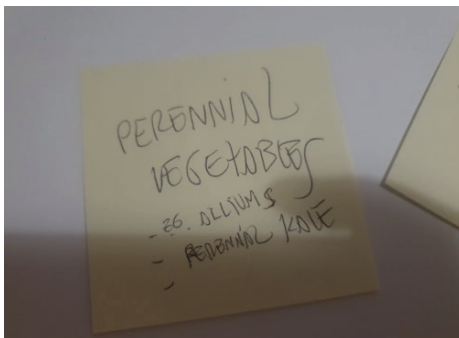

Not all the ideas presented could be used, some ideas were exotic or invasive plants or trees.

We have ruled out trees as a possibility due to the small space of the land and it's positioning so close to the building - which could cause damage.

Key Resident Ideas

- * Bee Friendly plants/herbs/flowers
- * Edible Uses
- * Colour Scheme: silver/purple to match the Bournville train station
- * Community herb garden

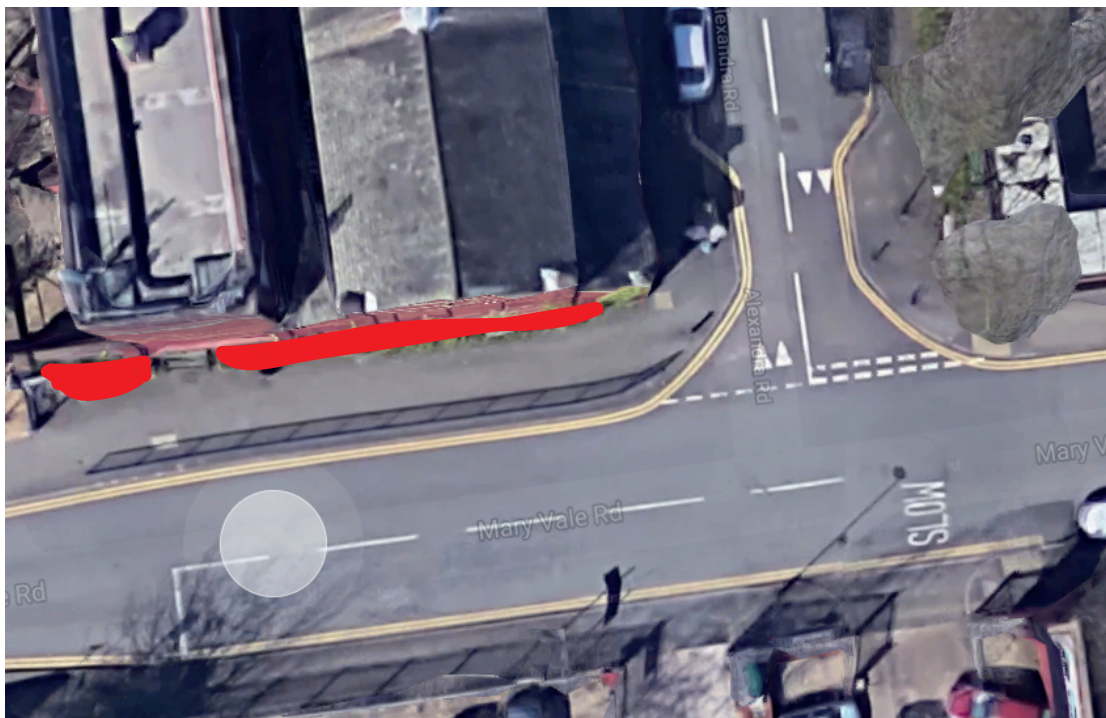

Key Issues

- * Must be non-invasive
- * Must be non-climbing
- * No Trees or known damaging plants

Plant Saving for relocation of existing plants that can be saved is scheduled for Sunday 27th October 2019 at 1pm with local residents.
